

Engineering Report - Sharon Bishop

I took over the responsibility of Engineering in August 2004 when the elected Station Engineer moved away. Ken has left me with a good legacy as most of the systems are working well and little or no major work needs to be undertaken.

I have attached a my work list for your information and I am sure as developments in new technology and the proposed new system at Llandough I will have plenty of work to keep me going for the foreseeable future.

I would wish to thank the Committee for all their support and encouragement along with the small engineering team who assist me.

I will be standing at this years AGM to take on the role as an elected member of the Committee and would ask for your support.

	Work	Status
1	Move security camera screen away from computer monitor in S1	Done
2	Headphone sockets	Done
3	Mount desk fans on wall	
4	Put curtains up in S2	In hand
